

Oct 19-1:01 PM

Diffusion: The process of molecules moving in and out of a cell through the cell membrane until they are equal on both sides.

Oct 19-1:06 PM

Equilibrium: when the concentrations of molecules in and out of the cell are equal (the same)

Oct 19-1:13 PM

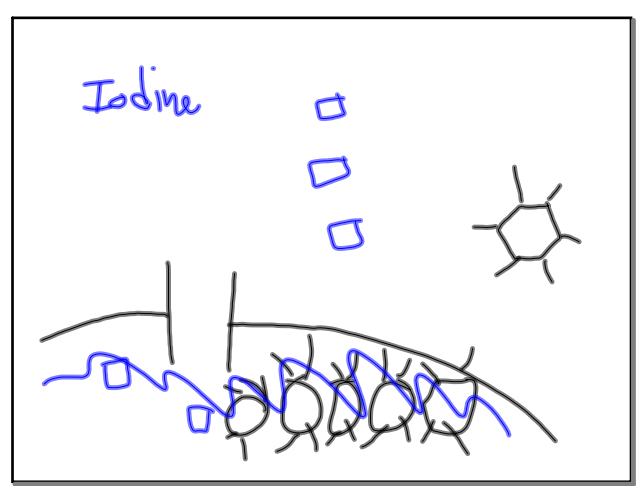

Oct 19-1:20 PM

The process of diffusion happened ~~was~~ until they were at equilibrium.

the molecules of glucose

The text 'the molecules' is circled in green, and an arrow points from it to the text 'of glucose'.
